THE PEOPLE'S
UNIVERSITY

No.IG/SOS/PGCGI/2015/783
June 15, 2015

Dear Sir/Madam,

Greetings from IGNOU, New Delhi!

As you may be aware, the Indira Gandhi National Open University, recognised as the 'largest University of the world' has contributed significantly to the development of higher education in the country through the Open and Distance learning (ODL) mode since its establishment in 1985. IGNOU offers 228 programmes through its 21 Schools of Study at the Doctoral, Master's and Bachelor's degree levels along with Postgraduate and Undergraduate Diplomas and Certificates with an annual intake of over 7 lakh students.

In the last four decades, geoinformatics has grown as a major tool for acquiring information on almost every aspect on the Earth. With the recent advancements in the field and availability of a variety of remote sensing data in recent years, applications of geoinformatics have increased manifold in a large range of applications. It has also resulted in the increased demand for professionals with a degree in environment and natural resources related domains and skills in applying geoinformatics tools. Considering the demand, the School of Sciences, IGNOU has designed and developed the *Post Graduate Certificate in Geoinformatics (PGCGI)* Programme.

We are happy to inform you that the six-month Post Graduate Certificate programme is on offer from July 2014 cycle in the Open and Distance Learning (ODL) mode. The objective of the PG Certificate programme is to provide conceptual knowledge and hands-on training in the basics of geoinformatics technologies and also to acquaint the learners with the use of technology in analysing the spatial data. The programme is built around concepts and skills at the basic level so as to make it easy for learners to understand how geoinformatics can be put to practical use. The hands-on training through the practical components of the programme will familiarise learners with the use of geoinformatics tools. The programme is worth 16 credits and consists of one practical course and three theory courses of 4 credits each.

Enclosed herewith please find a Poster and an information brochure of the programme for your kind perusal. I shall be grateful, if you could arrange to get it displayed prominently on your notice board so that students interested in pursuing a career in geoinformatics may get access to this opportunity. You may also like to visit our website www.ignou.ac.in for more details.

Thank you.

With kind regards,

Yours sincerely,

Vijayshri
(Vijayshri)

Post Graduate Certificate in **GEOSINFORMATICS**

- A continuing education programme aimed to enhance skills in geospatial technology with strong practical component.
- Covers aspects of Geospatial data, Cartography, GIS, Remote Sensing, GNSS, Image Interpretation, Digital Image Processing.

COURSES

- Introduction to Geoinformatics
- Remote Sensing and Image Interpretation
- Global Navigation Satellite System and Geographic Information System
- Geoinformatics Practical

Eligibility	: Graduation in any discipline from a recognised university
Age	: No bar
Medium	: English
Duration	: Minimum 6 months and maximum 2 years
Programme Fee	: ₹ 5000/-

TARGET GROUPS

- Defence personnel
- CBSE school teachers teaching geospatial technology courses
- Working professionals with little or no exposure to geoinformatics
- Graduates interested in developing skills to work with geospatial data

How to Apply: Application Form is available at your nearest IGNOU Regional Centre and also at www.ignou.ac.in
